 Hitachi Zaxis (Medium) ZX650-ZX870	MA70-205S

Teeth designs for all digging conditions. Contact your local branch for more details.

## STANDARD

The best for general purpose digging. Centreline design is scalloped top and bottom to keep them sharp and square.

## SABRE TOOTH

Excellent in shale, clay and other tight soils. Reversible, for maximum sharpness and wear life.

## COMPLIMENTARY MACHINE INSPECTION?

Receive 5% off the standard parts and labour rates when repair work is booked within 14 days of a ConSite machine inspection being completed. Applicable to construction sized excavators and wheel loaders only.

Contact your local branch today to find out more
